Distributed version control system

Git – Installation

Installation

- <https://git-scm.com/>
- `sudo apt-get install git-all`
- `brew install git`

Configuration

- `git config --global user.name "Rahul Sharma"`
- `git config --global user.email rahulsharma@gmail.com`
- `git config --global color.ui auto`
- `git config --global core.editor "code --wait"`
- `git config --list`

Git – Installation

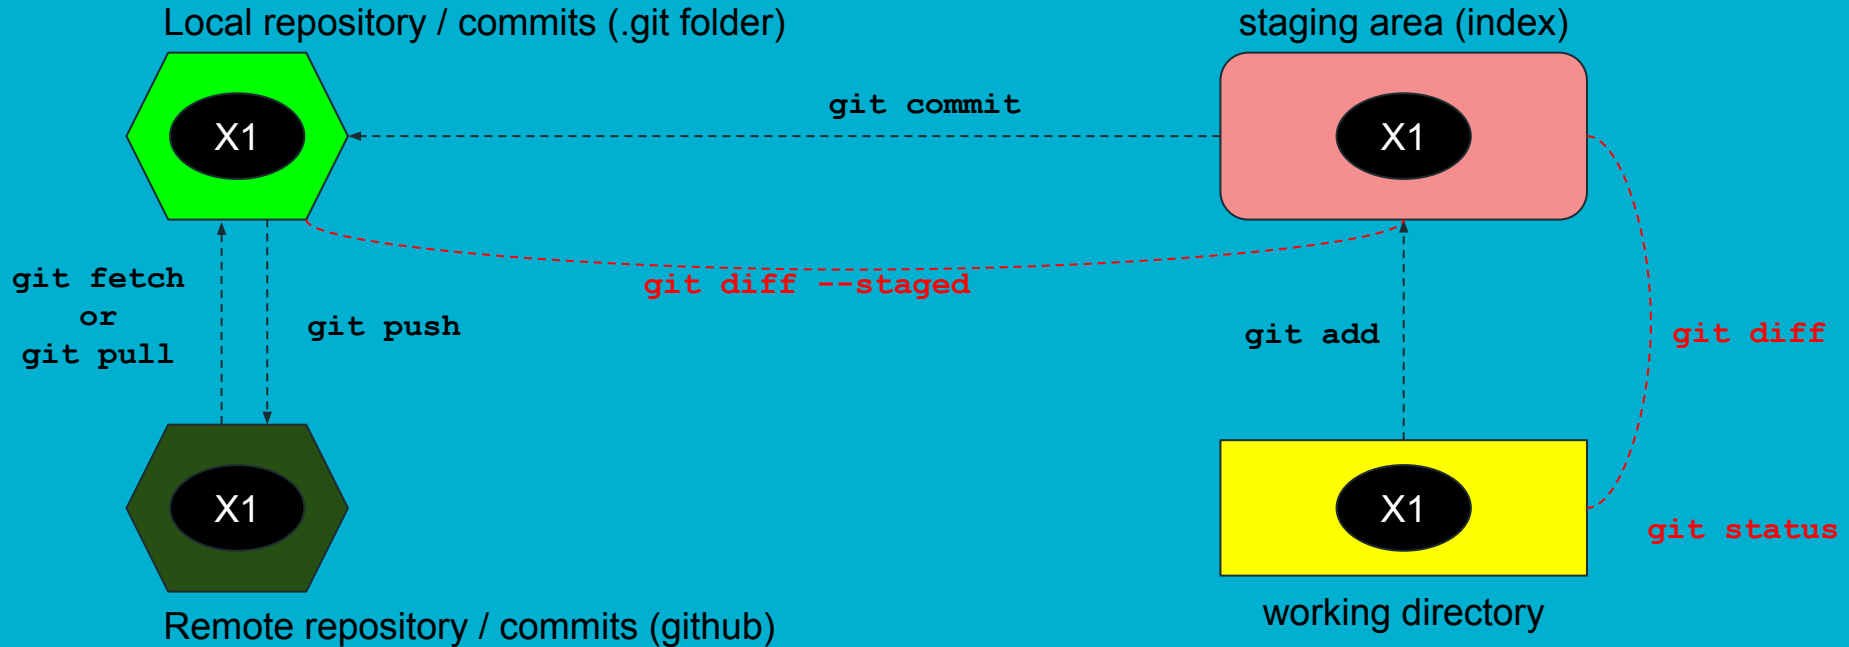

Creating a new local repository

- `mkdir mysourcerepo`
- `cd mysourcerepo`
- `git init`

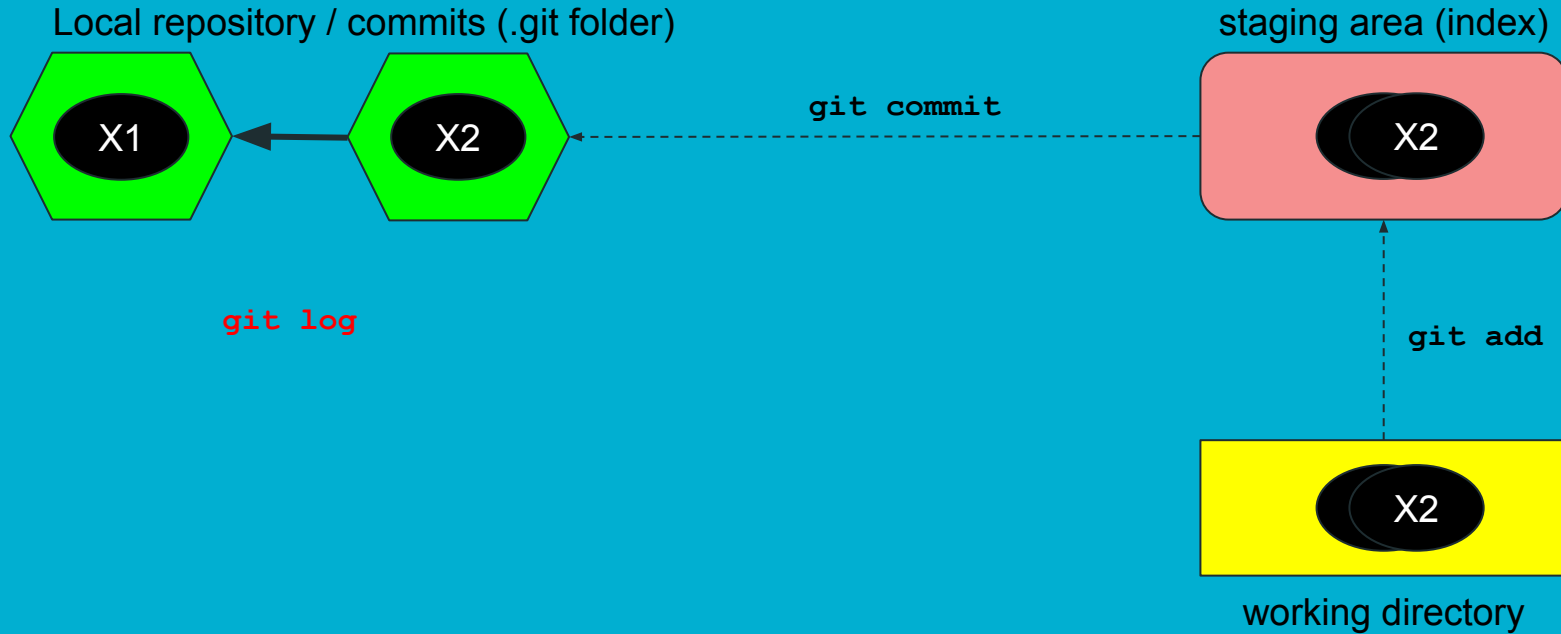

Cloning an existing remote repository

- `mkdir mysourcerepo`
- `git clone https://github.com/skewcode/101-github.git mysourcerepo`

Git - Basic Concepts

Git - Basic Concepts

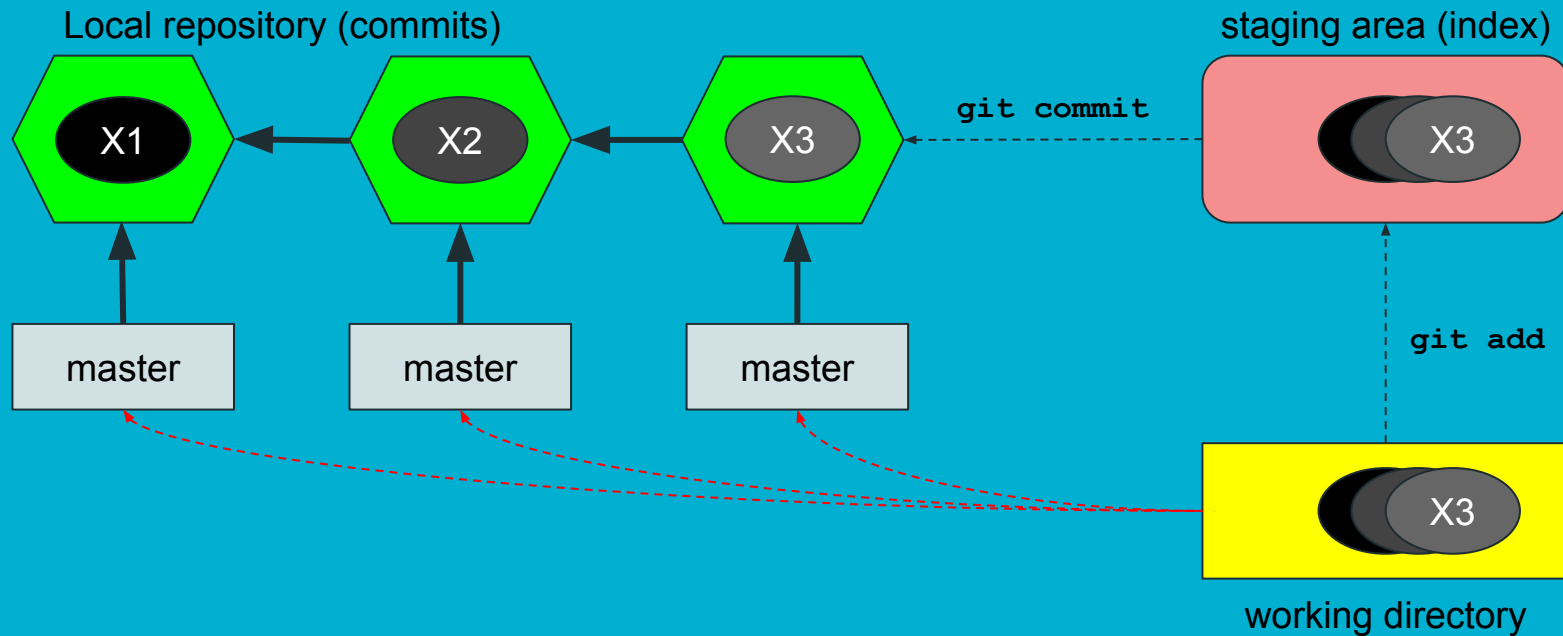

Git - Remotes

```
git remote -v
```

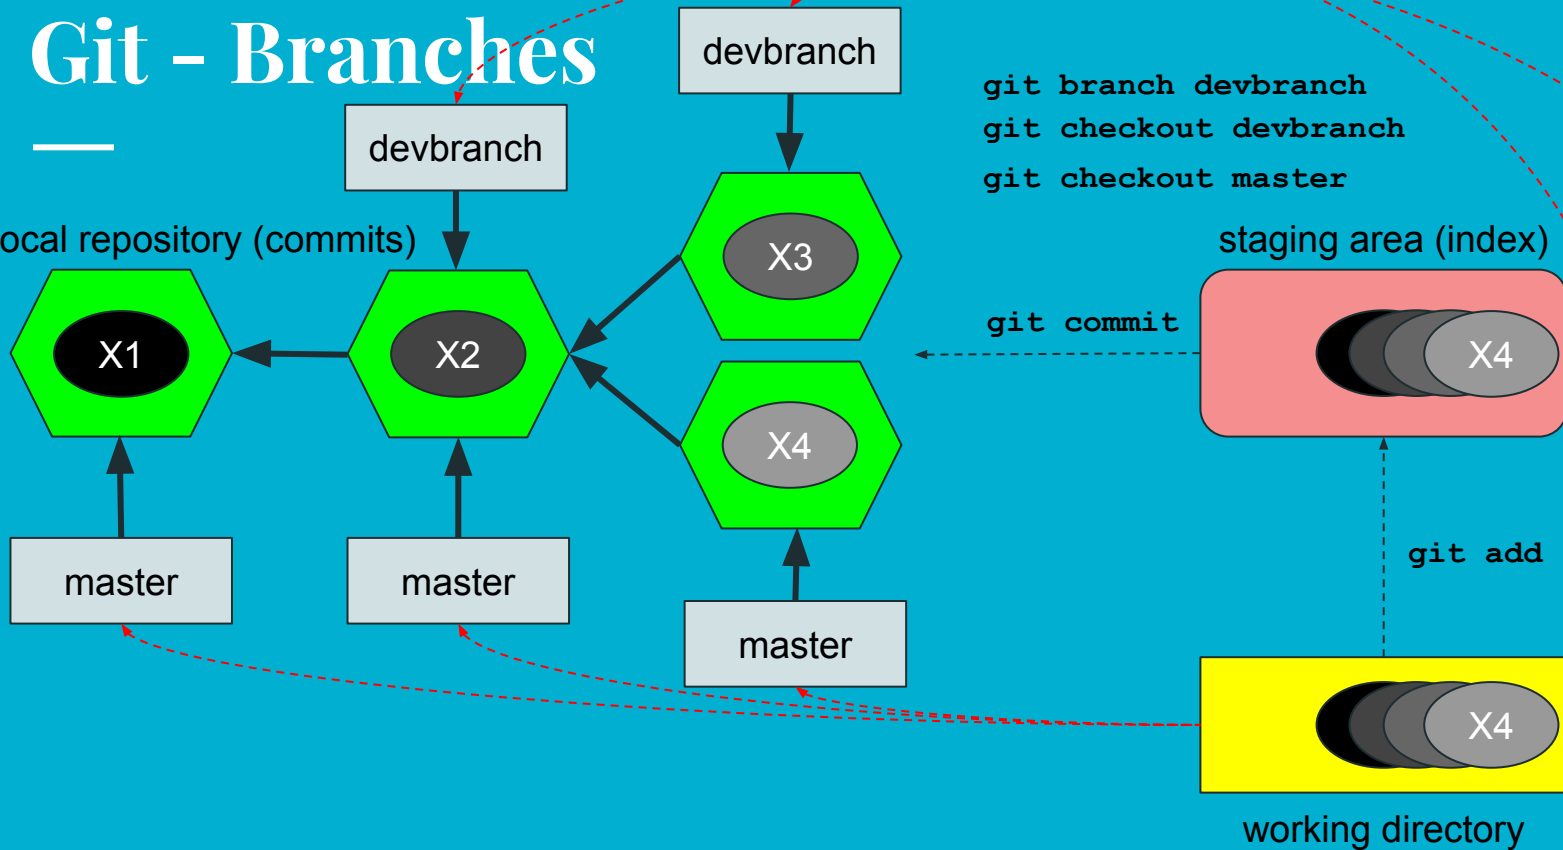

Git - Branches

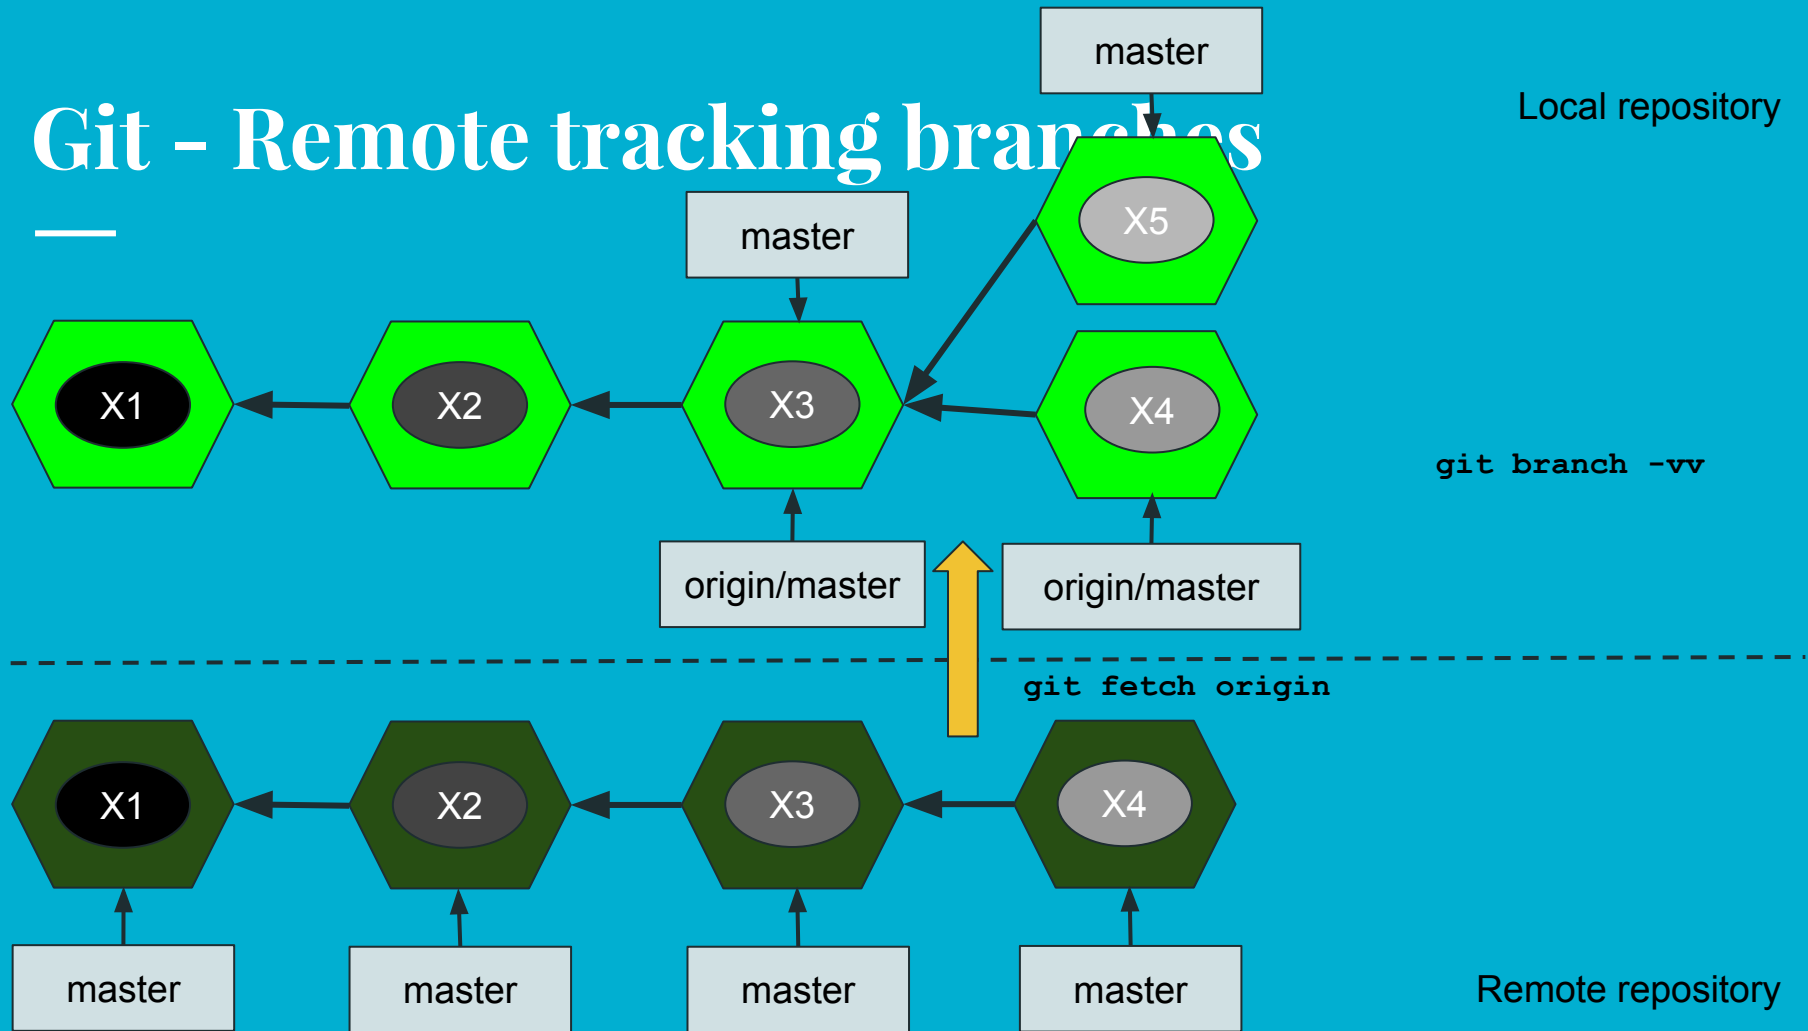

Git - Branches

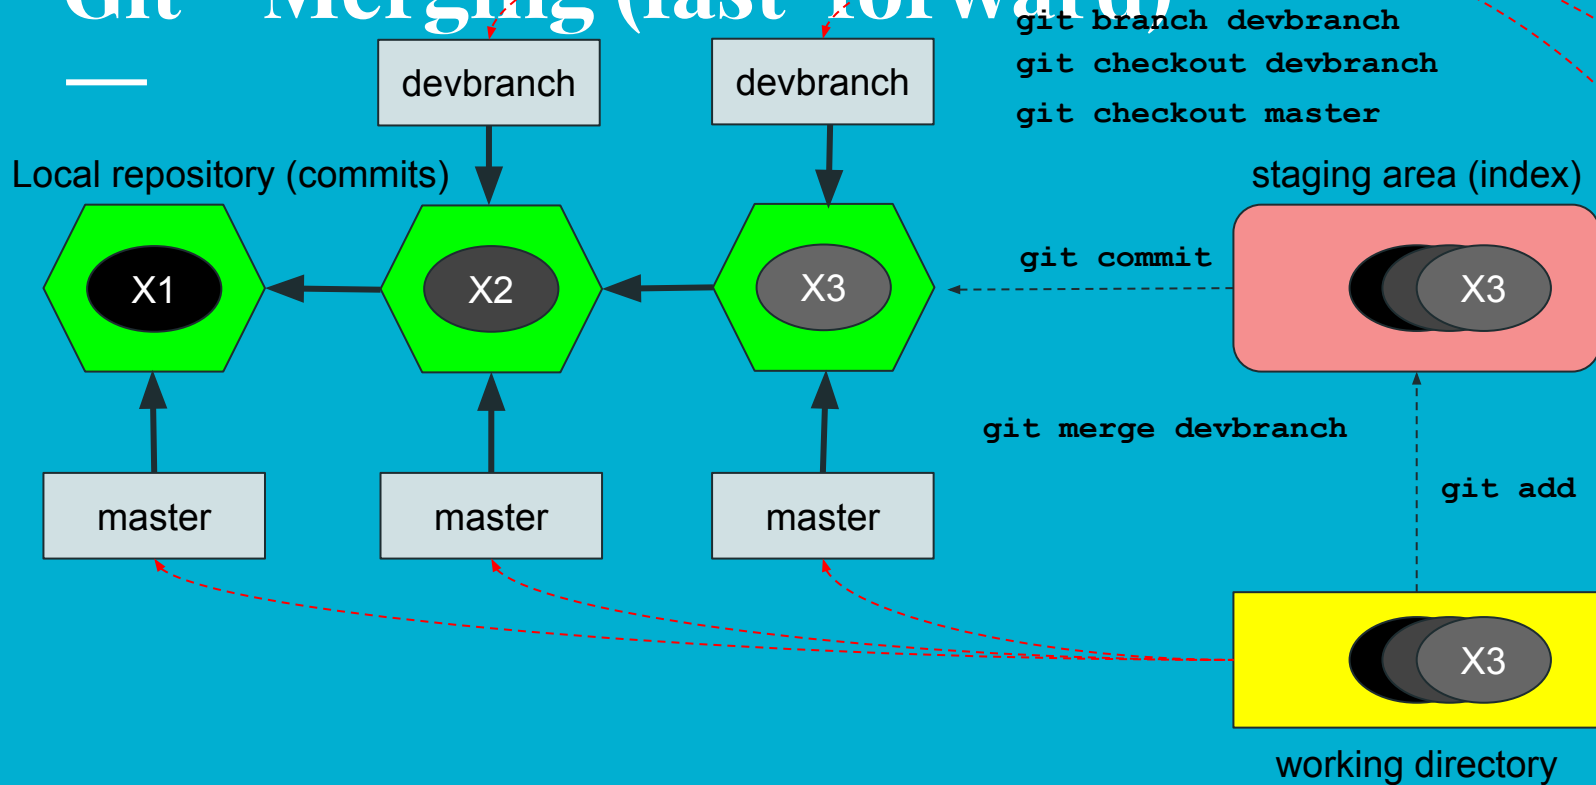

Local repository (commits)

Git - Remote tracking branches

Git - Merging (fast-forward)

Git - Merging (the way)

Local repository (commits)

master

devbranch

master

devbranch

master

```
git merge devbranch  
git branch devbranch  
git checkout devbranch  
git checkout master
```

master

staging area (index)

git add

working directory
